KEYWORDS AND COMMENTS

Keywords in R:
- that are not used a a variable naming
- we can view these keywords by using.
  either help(reserved) or ?reserved.

if	else	while	repeat	for
function.	in	next	break.	TRUE
FALSE	NULL	Inf	NaN	NA
NA_integer.	NA_real	NA_complex_	NA_character.	

→ The ones left are used as constants like TRUE/
  FALSE are used as Boolean Constants.
→ NaN = Not a Number
→ NULL = undefined value.
→ Inf = infinity values.

* R language is case Sensitive language.

Comments in R:
  (i) Single line comments: by using "#" symbol
  (ii) multi line comments.
  (iii) Documentation Comments.

- R doesn't support multi-line and Documentation
  Comments but R allows commenting multiple.
  Single lines at once.
- There are two ways to add multiple single-line
  comments in R studio.
  (i) "control + shift + c"
  (ii) code → comment/uncomment line.
